

The Nano-Thermal Bioengineering Laboratory (NT-BEL) at The University of Texas at Dallas is looking for one Postdoctoral Researcher to work on the development of neuro nanotechnology for brain drug delivery via blood-brain barrier opening, and nano uncaging to modulate neuron activity in the brain.

Requirements:

- Experience in nanomaterials is required;
- Experience in cell culture technique is required;
- Experience in small animal work is required;
- Experience in imaging is a plus;
- Experience in blood-brain barrier or neuroscience is a plus;
- Teamwork spirit and strong motivation is essential.

To apply, please send a cover letter and your CV with contact information of at least 3 references to Dr. Zhenpeng Qin by email (zhenpeng.qin@utdallas.edu). In the cover letter, please briefly describe your research experience, career plan, earliest starting date, and etc. The position is open immediately and we anticipate filling the position as soon as possible. Salary depends on experience level and will be negotiated.
