Glucose Monitor

**Audriana Sedmak, Benjamin Robles, Emma
Rodriguez, Mitchell Miranda, Spencer
Brimley**

Problem Statement

- 29 million people have diabetes and 86 million people have prediabetes (in U.S.)
- Current solutions are painful and confusing for new and young diabetes patients
- Current solutions do not allow immediate communication between patients and their health care providers
- The target population is children and newly diagnosed diabetes patients

Current Competition

- Blood Glucose Monitoring Device
- Tear Glucose Monitoring Device (patent pending)
- Saliva Glucose Monitoring Device (patent pending)

Our Solution

- Less painful and less invasive
- Tests saliva (test strips)
- Features Bluetooth
- Helps patients understand how to respond to the glucose readings

Market Size

- Approximately 29.1 million people in the U.S. have diabetes
- 349.00 USD
- U.S. Market Size: > 500 million USD
(based on 5% of the population of people with diabetes)
